

MARLON STEINER

Junior Full Stack Developer

msteiner.sudo@gmail.com • linkedin.com/in/marlon-steiner • github.com/MarlonSteiner • St. Gallen, Switzerland • Available immediately

PROFILE

Full stack developer with modern web development training and 4+ years of technical experience across mechanical systems, enterprise software and robotics development.

EXPERIENCE

Freelance Ecommerce Developer

2025 • Entrepreneur, Zurich

- Built a jewellery website for Juwelier Mahler on WordPress, responsive across all devices.
- Customised themes and applied modern web design principles for a luxury retail presence.
- Deployed and hosted on Hostinger, handling domain configuration and ongoing maintenance.
- Worked directly with the client to turn business requirements into a working implementation.

Inventory Control Specialist

2024 • Rheinmetall Air Defence AG, Switzerland

- Documented and managed enterprise inventory systems in SAP, working with complex database records.
- Used Jira and Confluence for tracking and technical documentation.
- Collaborated with cross-functional engineering and production teams.

Assistant – Robotics & Software Development

2022–2023 • ETH Zürich Autonomous Systems Lab

- Designed UI for computer software in Figma and Qt Creator, alongside software engineers.
- Researched and developed UX concepts from ideation to implementation on robotics projects.
- Managed procurement of technical components and coordinated with suppliers.
- Supported doctoral and master students with PCB soldering, 3D printing, laser cutting and CAD in Fusion 360.

Civil Service – Community Integration

2022–2023 • TISG Refugee Center Rosenau, St. Gallen

- Supported Ukrainian refugees with administrative processes, accommodation and integration services.
- Organised and taught German language courses.
- Managed documentation and database entries in specialised refugee management software.

Polymechanic

2020–2022 • Gietz AG, Switzerland

- Precision mechanical assembly for punching and embossing machines.
- Electrical cabinet wiring, working from schematics.
- Worked with engineering teams to optimise manufacturing processes.
- Maintained quality standards and technical documentation.

SKILLS

Front end

HTML5 & semantic markup, CSS3, Sass/SCSS, JavaScript ES6+, Bootstrap, responsive design, cross-browser compatibility, web performance, accessibility (WCAG)

Back end & data

Ruby on Rails, Python, C, SQL, PostgreSQL, database design, RESTful API integration

Tools & practice

Git, Jira, Confluence, agile methodology, software engineering principles, data structures & algorithms, web hosting & deployment, domain management

Design & other

UX/UI design, Figma, Qt Creator, SAP, WordPress, CAD (Fusion 360), 3D printing, Blender, Unity

EDUCATION

Le Wagon Web Development Bootcamp

2025 • Cape Town, South Africa

- Full-stack web development with a front-end specialisation.
- JavaScript, Ruby on Rails, PostgreSQL, Bootstrap, Flexbox and Grid.
- Built "Logs AI", an audio journal application with speech summarisation.
- Deployed with Git and Heroku.

CS50: Introduction to Computer Science

2024–2025 • Harvard University, online

- Computer science fundamentals, algorithms and data structures.
- C, Python, SQL, JavaScript, HTML/CSS.

Self-directed Computer Science & UX Design study

2023–2025 • Independent, St. Gallen

- Computer science fundamentals, UX design principles and modern web technologies.
- Google UX Design certification.

Federal Certificate in Polymechanics

2016–2020 • Swiss Vocational Education System

- Four-year apprenticeship. Specialised in precision assembly and technical systems.

CERTIFICATIONS

- Web Development Certificate – Le Wagon
- Swiss Federal Certificate in Polymechanics – Swiss Federal Institute for Vocational Education and Training
- UX Design Fundamentals and Process
- JavaScript Fundamentals
- Responsive Web Design
- Learning How to Learn

LANGUAGES

- English – native
- German – native
- Tagalog – fluent
